

Catch Basin Cleaning RFP questions:

1. Please advise how the disposal will be handled. My interpretation is that it will be billed to you directly from Commercial Paving, and we would turn in the weigh tickets for your verification. It further states that the weigh tickets are part of the month requisition. That leads me to question if we are to pay for the disposal and get reimbursed for the expense. Please advise.

In other words - Who is responsible for the sediment disposal costs?

- The contractor is responsible for paying Commercial Paving for disposal. The disposal costs need to be included as part of the "per catch basin" unit cost provided in your proposal. The weigh tickets are included as part of the pay requisition only to provide confirmation of proper disposal.
